

# YEVHENII MARTYNENKO

## JUNIOR QA ENGINEER

### PROFILE

I write clear test cases, checklists, and bug reports. I use Jira, TestRail, Chrome DevTools, and Postman. I know the basics of HTTP/REST, JSON, and SQL. I apply Equivalence Partitioning and Boundary Value Analysis (EP/BVA), run positive/negative scenarios, and assess UI/UX and input validations. I have team experience on pet projects. Ready to ramp up quickly on testing web forms, authentication/login flows, and basic APIs with mentorship.

### PROJECTS

- **Swag Labs (Web) — Login:** functionality, validations, UI/UX.  
Artifacts: Requirements (19), Checklist (32), Test Cases (15).  
Traceability: 19 requirements mapped to tests, Bug Reports (5).  
EP/BVA.
- **“Kapusta” Personal Finance (team)** — QA Engineer (coordinating role): requirements clarification, Figma review; Checklists, Test cases; front-end/back-end; Bug reports; Chrome DevTools (Network). Focus: scope planning, task split, defect prioritization; regular mentorship meetings, artifact reviews, applied feedback.
- **Course Practice** — Web UI & basic API: test cases and bug reports; Postman requests; SQL in DBeaver; JSON/XML creation; RTM; documentation testing; Git; client-server fundamentals.

### WORK EXPERIENCE

#### Sales Specialist — **PepsiCo** | June 2019 — January 2021

- Ensured on-shelf availability and merchandising across the territory and prepared weekly sales and inventory reports
- Analyzed competitors and provided data-driven insights to sales management
- Negotiated extra retail space and coordinated equipment installations, delivering +20% sales growth in the first year

#### Sales Representative — **Obolon PJSC** | August 2018 — May 2019

- Prospected and onboarded new clients; led negotiations and product demos
- Managed reporting and sales pipeline documentation
- Closed a key account contract, contributing to revenue growth
